

**AMENDMENTS TO THE SPECIFICATION:**

Please replace paragraph [0024] with the following amended paragraph:

[0024] Referring to FIG. 6, there is shown a block diagram of an exemplary data processing system **600** according to one embodiment of the invention. The data processing system is suitable for implementing EPS graphics technology. The data processing system **600** includes an input device **610**, a central processing unit or CPU **620**, memory **630**, and a display **640**. The input device **610** may be a keyboard, mouse, trackball, or similar device. The CPU **620** may include dedicated coprocessors and memory devices. The memory **630** may include RAM, ROM, databases, or disk devices (e.g., a computer program product). And, the display **640** may include a computer screen or terminal device. The data processing system **600** has stored therein data representing sequences of instructions (e.g., code) which when executed cause the method described herein to be performed. Of course, the data processing system **600** may contain additional software and hardware a description of which is not necessary for understanding the invention.
